Part III DETAILED ACTION

Claims 3-11, 18-28 are pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-11,23 drawn to method of treating a staphylococcal infection, classified in class 514, subclass 21.
- II. Claims 18-22,24-28, drawn method of enhancing effectiveness of lysostaphin, classified in class 424, subclass 114.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as independent methods which are not connected in design, operation or effect. The methods have different functions. Further, the method of Group I is *in vivo* method, whereas method of Group II is viewed as *in vitro* method. Because these inventions are distinct for the reasons given and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, and the necessity for non-coextensive literature searches restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
